

Talking to your doctor about your flu symptoms and treatment can help ensure you get the best possible care. To help with this discussion, here are a few things you'll want to tell your doctor, as well as some questions to ask at your next appointment.

Tell your doctor if you're experiencing any of the following possible flu symptoms:

- | | | |
|--|-------------------------------------|---|
| <input type="checkbox"/> Fever: Temp _____ | <input type="checkbox"/> Chills | <input type="checkbox"/> Muscle pain or aches |
| <input type="checkbox"/> Fatigue | <input type="checkbox"/> Runny nose | <input type="checkbox"/> Sneezing |
| <input type="checkbox"/> Sore throat | <input type="checkbox"/> Cough | <input type="checkbox"/> Headaches |

When did your symptoms first appear?

Have you or a family member been recently exposed to someone who has flu symptoms?

Don't wait. Talk to your doctor within 48 hours of your first flu symptoms.

Ask your doctor if prescription XOFLUZA is right for you.

The information presented here does not replace the advice of your healthcare team. Please talk with your healthcare team about your medical condition and treatment.

Indication

XOFLUZA is a prescription medicine used to treat the flu (influenza) in people 12 years of age and older who have had flu symptoms for no more than 48 hours.

It is not known if XOFLUZA is safe and effective in children younger than 12 years of age or weighing less than 88 pounds (40 kg).

Important Safety Information

Do not take XOFLUZA if you are allergic to baloxavir marboxil or any of the ingredients in XOFLUZA.

Before you take XOFLUZA, tell your healthcare provider about all of your medical conditions, including if you:

- are pregnant or plan to become pregnant. It is not known if XOFLUZA can harm your unborn baby
- are breastfeeding or plan to breastfeed. It is not known if XOFLUZA passes into your breast milk

Tell your healthcare provider about all the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.

Talk to your healthcare provider before you receive a live flu vaccine after taking XOFLUZA.

Take XOFLUZA with or without food. Do not take XOFLUZA with dairy products, calcium-fortified beverages, laxatives, antacids, or oral supplements containing iron, zinc, selenium, calcium, or magnesium.

The most common side effects are diarrhea, bronchitis, nausea, common cold symptoms (nasopharyngitis), and headache.

XOFLUZA is not effective in treating infections other than influenza. Other kinds of infections can have symptoms like those of the flu or occur along with flu and may need different kinds of treatment. Tell your healthcare provider if you feel worse or develop new symptoms during or after treatment with XOFLUZA or if your flu symptoms do not start to get better.

Please see the XOFLUZA full [Prescribing Information](#) for complete safety information.

You are encouraged to report side effects to Genentech by calling 1-888-835-2555 or to the FDA by visiting www.fda.gov/medwatch or calling 1-800-FDA-1088.
